

WORKING STUDENT iOS DEVELOPER (f/m/d)

You love coding and are looking for the right opportunity to become part of something exceptional? You want to build amazing products that make the lives of photographers easier every day? You want to be part of a tech company that is changing an entire market? Then join our team.

THE OPPORTUNITY

Over 250.000€ on Kickstarter and Indiegogo. With our newest product "UNLEASHED" Foolography became one of the most interesting hardware startups in Berlin, moving the worldwide photography market forward. Working on the UNLEASHED and with many more exciting products in the pipeline, we want to build a strong team willing to not only build high quality gadgets for photographers, but also help move the dusty photography market into a bright future: Improving how you shoot photos, optimizing photography workflows and providing new opportunities to be creative.

For our team in Berlin we're looking for a **working student for iOS development**.

Between 10-20 hours per week, full-time in semester break if possible.

Starting with an internship and continuing as working student is also possible.

THE STORY

Foolography is a small hardware company in the heart of Berlin, founded in 2009. Keeping a startup mentality allows us to focus on creating extraordinary products for promising niche markets. Our mission has been to provide intelligent solutions to equip photographers all around the world. Our objectives along the way: finding and combining the right technical components that meet our highly set goals, reverse engineering and breaking down complex systems, building tiny, perfected products and apps that are fun to use and create a real benefit for those who use them.

WHAT EXCITES YOU?

- Concepting and planning apps that will be used by thousands of photographers
- Building cool interfaces for beautiful iOS apps
- Working together with a senior ios developer to let you become a better engineer with every step you take

WHAT IT TAKES TO SUCCEED?

- A heart for IT and excitement for the newest gadgets
- Experience with the Cocoa developer's toolset [Swift and/or Objective-C, iOS SDK, Xcode or AppCode, Instruments]

WORKING STUDENT iOS DEVELOPER (f/m/d)

FOOLOGRAPHY

- Ability and striving to implement smoothly working interfaces for iOS apps
- Maintainable Code with comments
- Solution-oriented thinking
- Fluent in English and/or German
- A passion for photography is a huge plus! ;-)

WHAT WE OFFER :

- A cool and engaged team with incredibly intelligent and motivated colleagues that are domain experts in various fields
- Help revolutionize a niche market that is in need of game-changing products – be part of something new and big
- A team that has the right mix of getting-things-done and getting-things-right mentality with a good amount of fun added to it
- Create things photographers all over the world will use on a daily basis
- Enjoy a flat hierarchy as well as quick and uncomplicated decision-making
- We're team players, so we love to go to meetups, conferences and try out the newest taco store

WANT TO JOIN US? GO AHEAD AND APPLY!

If we've sparked your interest we're looking forward to a short application with CV, overview of grades and any reference projects you've been part of. **Please be aware that we will only consider enrolled students (at least six more months of studying) as possible candidates – current "Immatrikulationsbescheinigung" required.**

Please send this, including the internal reference number **[APWS2012]**, to us via email to **job@foolography.com** and we'll get in contact with you for a personal interview.
